

NITIN MISHRA

New Delhi, India | +91 88823 58729 | nm1823927@gmail.com | [linkedin.com/in/nitin-mishra14](https://www.linkedin.com/in/nitin-mishra14) | github.com/nitinmishra-ai

PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate seeking opportunities in AI Engineering, Machine Learning, and Data Analytics. Skilled in Python, SQL, Power BI, Machine Learning, Deep Learning fundamentals, and cloud platforms. Experienced in building projects involving data analysis, predictive modeling, and computer vision. Strong analytical mindset with a passion for transforming data into actionable insights and developing intelligent solutions that solve real-world problems.

EDUCATION

Guru Gobind Singh Indraprastha University

New Delhi, India

Bachelor of Technology in AI/ML | Expected Graduation: June 2027

TECHNICAL SKILLS

Core: Python, SQL, DBMS, OOPS, Data Structures & Algorithms (DSA), FastAPI

Machine Learning: Linear Regression, Logistic Regression, K-Nearest Neighbours (KNN), Decision Trees, CNN, LLM, RAG

Data Analytics: Power BI, Data Cleaning, Data Visualization, Dashboard Development

Cloud & Tools: IBM Cloud, IBM Watson Assistant, Jupyter Notebook, Google Colab

PROJECTS

Crave AI — Mood-Based Food Recommendation System

Tech Stack: Python, NLP, TF-IDF, SGDClassifier, Cosine Similarity, FastAPI, MySQL, JWT

- Developed an AI-powered food recommendation system that predicts user emotions using NLP and machine learning, then recommends personalized food choices based on mood.
- Implemented text preprocessing, TF-IDF vectorization, and an SGDClassifier model alongside cosine similarity for recommendation ranking.
- Built a FastAPI backend with MySQL database integration and JWT authentication, including feedback-based model retraining for continuous improvement.

AI Customer Support Agent

In Progress

Tech Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, Alembic, JWT, LLM, RAG, Vector Database

- Building an AI-powered customer support backend using FastAPI, PostgreSQL, JWT authentication, and robust conversation/message management.
- Integrating LLM models, RAG-based knowledge retrieval, embeddings, and vector database search to enable context-aware agent workflows.
- Designing conversation context handling to generate grounded, accurate responses across multi-turn support interactions.

CERTIFICATIONS

- Build Your Own Chatbot (CB0101EN) — IBM Certificate
